

## Student Instructions: Build and Share Your Web Page

### Instructions:

In this activity, you will create a simple web page using HTML and CSS. You will use an online code editor called JSFiddle to write and test your code. When you're done, you'll share your web page link on the class Padlet and reflect on your experience.

### Steps:

1. Go to <https://jsfiddle.net>
2. Copy and paste the HTML code below into the HTML pane.
3. Copy and paste the CSS code into the CSS pane.
4. Click the 'Run' button to preview your webpage.
5. Edit the text, colors, or styles to make it your own.
6. Copy your JSFiddle URL and post it on the class Padlet.
7. In your Padlet post, reflect on:
  - What part of the activity did you enjoy most?
  - What was the most challenging?

### HTML Code:

```
<!DOCTYPE html>
<html>
  <head>
    <title>My First Web Page</title>
  </head>
  <body>
    <h1>Welcome to My Page</h1>
    <p>This is my first paragraph. I'm learning HTML and CSS!</p>
    
  </body>
</html>
```

## CSS Code:

```
body {  
  background-color: #f0f8ff;  
  font-family: Arial, sans-serif;  
  padding: 20px;  
}
```

```
h1 {  
  color: #0066cc;  
  text-align: center;  
}
```

```
p {  
  font-size: 18px;  
  color: #333333;  
}
```

```
img {  
  display: block;  
  margin: 20px auto;  
  border: 2px solid #000;  
}
```
